**Integrated
Systems
Europe**

Europe's No.1 show for professional
AV and electronic systems integration

Press release

Meridian at ISE 2011 Strongest Line Up Ever On Show – Includes Three New Product Launches

Meridian is showing a wealth of new and recently released products at **Integrated Systems Europe, Amsterdam RAI (1–3 Feb) at Stand 4N60, in Hall 4.**

Products showing for the first time at ISE include the Audio Core 200 and DSP3200 loudspeaker system – a complete high-quality Meridian set-up with the company's signature DSP loudspeakers in the most compact form yet, driven by a versatile multi-input stereo audio controller. There is also the Media Core 200, another Meridian Sooloos product with Meridian shared technologies.

The Media Core 200 is a complete Meridian Sooloos system with 1000-album storage and single-zone analogue and digital playback capability. It just needs the addition of one of the many options available to control a Meridian Sooloos system – and it is extremely elegant and compact.

The recently introduced Control 15, a complete Meridian Sooloos touch-screen system in a single enclosure will also be on show, and in addition, the company will be showcasing the Meridian 810 Reference Video System.

The 810 system comprises two primary elements: the 810 Reference Video Projector, an entirely new D-ILA-based digital projector offering a previously impossible 10 megapixels – exceeding the resolution even of

commercial digital cinema projectors – and the 810 Reference Video Scaler, a special processor designed to optimise the imaging of HD and standard resolution inputs for the vast new possibilities offered by a 10 megapixel projection environment. The result is a system that, Meridian believes, represents the most realistic home theatre performance in the world.

Separate Press Releases detailing all the products mentioned will also be issued, prior and during ISE.

RELEASE ENDS/No Embargo/ Dated: ISE 1–3 February 2011

About Meridian Audio Limited

Meridian is based near Cambridge, UK, and was founded in 1977 by Bob Stuart and Allen Boothroyd. With over 30 years' history of innovation and development of uncompromised consumer home entertainment systems offering exceptional performance, this award-winning company is widely recognized as a world leader in high-quality audio and video reproduction. Meridian developed the first audiophile CD player, the world's first consumer digital surround controller, and the MLP lossless packing system included in Blu-ray Disc. The company's optical disc players, DSP-based loudspeakers, video projectors, and scalars are unique in the industry, maintaining a super-quality digital signal throughout the path from the studio to the home, using advanced digital signal processing to deliver both a sweet, natural sound and smooth, crystal-sharp images with true cinematic realism. In late 2008, Meridian acquired leading networked media server developer Sooloos, and today the Meridian Sooloos Digital Media System offers a unique combination of superb digital audio quality with the world's most innovative, flexible and intuitive touchscreen-based home entertainment system.
