

The Quad L Series

Since 1936, every Quad product has followed an underlying philosophy – to bring you 'the closest approach to the original sound'. This philosophy has earned Quad the respect of acoustic engineers, musicians, recording artists and music-lovers the world over and remains undiluted today.

“The scale and authority of their performance is breathtaking”

– Quad 11L – *What Hi-Fi?* (Aug 2002)

Our all new 'L' Series is an accurate reflection of this philosophy. An even and extended frequency response, which is capable of incredible detail and resolution, creates a real 'window' on the recording. The sound stage is so vivid and expansive, you can virtually see the musicians in front of you. The 'L' series are all finished in high gloss piano lacquers, either in pure black, maple, bird's eye maple or rosewood veneer. Prices start from just £380.
