MERIDIAN ULTRA DAC AT A GLANCE

Features an extensive range of connectivity options; including USB 2.0, S/PDIF, TOSLINK, 75 Ohm BNC and AES3 on XLR as well as Meridian's Speakerlink.

Compatible with Sooloos, our award-winning and user-friendly lossless music management and streaming platform.

Resolution enhancement technologies have been included to deliver the very best performance from any digital source.

270 bespoke RAL finishes available, allowing you to integrate with any interior.

Hierarchical Converter Technology by MQA employs multiple converters to increase temporal resolution while also reducing noise and quantisation errors on all content.

Dedicated clock card to ensure the lowest possible jitter. Incorporates Meridian's FIFO buffering, folding down all jitter below 0.5Hz, below the audible range.

Includes a linear power supply which provides outstanding stability and isolation from the AC supply.

Control 4 and Crestron control options, plus RS232 and Meridian Comms.
